Hi Grace,

Good questions. Do you mean reporting/providing checklist in your semiannual report to EPA or Neport annual reports?

I think as long as you have the checklist online, that's enough. I think if you just add a brief description about how this meets stormwater requirements in Neport, that would be sufficient. How does that sound?

Erica

I wondered that myself since inspections DO satisfy MS4 permit requirements by the cities. At first, I also checked meeting stormwater requirements but wasn't sure if that changes the way I report progress. For example, do we need to provide checklists as "proof" or provide other additional information?

I'll let Grace answer when she gets a chance.

Btw, I don't think your comments saved on Neport. □

Thanks.

Thanks, Marcelo and Grace.

I was just wondering if this should all be for education or if it's also meeting stormwater requirements? That's what I said in my comments.

Have a good weekend,

Erica

Hi Erica,

Grace is aware of Redoing this project on Neport. She will await further instructions.

If I don't talk to you today, have a great weekend!

Marcelo
